

EducationOS Workflow Pain Point Questionnaire

For tutors, teachers, parents, homeschool groups, training providers, and education operators.

Research use only: Please do not include patient information, customer private information, employer confidential data, internal screenshots, proprietary documents, passwords, private metrics, or anything that should not leave the company. Keep answers general and workflow-focused.

1. Background

1. What education role best describes you?

2. What ages or grade levels do you work with?

3. What subjects or skills do you teach?

4. What learning environments do you use?

5. What part of education work takes more time than it should?

2. Student and Learning Needs

6. What makes it hard to understand a student's true learning level?

7. How do you track physical age, grade level, developmental level, and subject-level ability?

8. What accommodations or learning needs are hardest to manage?

9. Where do students fall through the cracks?

10. What should an education system help identify without diagnosing?

3. Lesson Planning and Instruction

11. How do you currently create lesson plans?

12. What lesson-planning tasks are repetitive?

13. What makes adapting lessons for different students difficult?

14. Where would AI-generated drafts help?

15. What should always remain under teacher/tutor control?

4. Parent and Student Communication

16. What information do parents ask for most?

17. What progress updates are hardest to explain?

18. How are scheduling, rescheduling, and cancellations handled?

19. What documents or reports should be easy to download?

20. What would make parent communication smoother?

5. Progress, Quizzes, and Certification

21. How do you measure progress today?

22. What quiz or assessment data matters most?

23. When should a student be ready for a certificate or completion record?

24. What should require human review before certification?

25. What reporting would help prove learning outcomes?

6. Marketplace and Content Creation

26. Do you create lesson plans, worksheets, quizzes, slides, or training materials?

27. Would you publish or sell educational content if the process was simple?

28. What content types would be most valuable?

29. What quality controls should exist before content is shared?

30. What would make a creator marketplace trustworthy?

7. Ideal EducationOS

31. What would save teachers/tutors the most time?

32. What should the system make easier for new educators?

33. What should AI never do in education?

34. What one feature would make the system immediately useful?

35. What would make parents, teachers, and students all trust it?
