

RetailOS / PharmacyOS Workflow Pain Point Questionnaire

For store managers, shift leads, pharmacy techs, pharmacists, inventory specialists, and retail employees.

***Research use only:** Please do not include patient information, customer private information, employer confidential data, internal screenshots, proprietary documents, passwords, private metrics, or anything that should not leave the company. Keep answers general and workflow-focused.*

1. Role and Store Context

1. What store role best describes you?

2. What departments or operational areas do you touch most?

3. Which daily tasks get interrupted most often?

4. What store process feels most outdated?

5. What task burns the most labor hours?

2. App Fragmentation and Device Workflow

6. How many different apps or systems do you use during a normal shift?

7. What task requires jumping between too many apps or screens?

8. What should be handled through one task-first workflow?

9. How could an Android/Zebra handheld workflow be improved?

10. Where does the scanner make tasks easier, and where does software still slow you down?

3. Inventory and Outdates

11. Which departments are most painful for outdates?

12. How long do outdates take by department?

13. What makes expiration dates hard to find or decode?

14. How do department-specific pull windows affect the work?

15. What would the ideal outdate task list show?

4. Scan-Out and Disposal Routing

16. What happens after an outdate is found?

17. What routing categories matter most?

18. Where do employees get confused about trash, RGM, toxic/hazardous, or other totes?

19. What should the system tell the employee after scanning an item?

20. What actions should require manager verification?

5. Temperature and Compliance Checks

21. What coolers, freezers, or fridges require temperature checks?

22. How are temps recorded today?

23. What happens when a temperature is out of range?

24. Would Wi-Fi probes reduce manual work?

25. What corrective action steps should the system show?

6. Store Walks, Recalls, and Safety Tasks

26. What compliance tasks are easiest to forget?

27. What recurring tasks rely too much on memory?

28. What tasks should have automatic reminders?

29. Where would photo proof or scan proof help?

30. What should managers see on a daily compliance dashboard?

7. Ideal RetailOS / PharmacyOS Workflow Layer

31. What should the system make obvious to a brand-new employee?

32. What should corporate still receive for reporting?

33. What should employees never have to manually remember?

34. What workflow would save the most money?

35. If one retail/pharmacy process could be redesigned, what would it be?
