

ServicesOS Workflow Pain Point Questionnaire

For cleaning business owners, cleaners, schedulers, and operators. Use this to identify real operational pain before building or polishing features.

Research use only: Please do not include patient information, customer private information, employer confidential data, internal screenshots, proprietary documents, passwords, private metrics, or anything that should not leave the company. Keep answers general and workflow-focused.

1. Background and Business Context

1. What type of cleaning business do you operate or work in?

2. How many people are involved in daily operations?

3. What services do you currently offer?

4. What part of the business creates the most stress or wasted time?

5. What tasks are hardest to keep organized during a busy week?

2. Leads and Customer Management

6. How do new leads usually contact the business?

7. Where do leads currently get tracked?

8. What causes leads to be missed, delayed, or forgotten?

9. What information do you wish was captured automatically when a lead comes in?

10. What would make follow-up easier?

3. Estimates and Pricing

11. How are estimates currently created?

12. What makes pricing difficult or inconsistent?

13. What details do you need before giving a good estimate?

14. How do pets, clutter, room count, stairs, or deep-clean needs affect pricing?

15. What would an ideal estimate workflow look like?

4. Contracts, Scheduling, and Payments

16. What paperwork or agreements are needed before a job starts?

17. What scheduling problems happen most often?

18. How are deposits and final payments handled today?

19. Where do discounts, family pricing, or special pricing cause confusion?

20. What payment or receipt process would feel easiest for customers?

5. Employee Job Execution

21. What information does a cleaner need before arriving at a job?

22. What should a cleaner do when they arrive?

23. What checklist steps should be obvious during a job?

24. Where would before/after photos help?

25. What should happen if a cleaner is stuck and needs an SOP?

6. Training, Quality, and Proof of Work

26. What tasks are hardest to train new cleaners on?

27. What quality problems happen when instructions are unclear?

28. What proof of work should be captured after each job?

29. What should owners/admins be able to see after a job is completed?

30. What would make recurring-service quality easier to maintain?

7. Ideal System

31. If one workflow could be fixed tomorrow, what would it be?

32. What would save the most labor hours?

33. What should the software make obvious to a brand-new hire?

34. What should never be automated without owner approval?

35. What would make this system worth paying for?
