

FutureAI Research Questionnaire

For exploring AI trust, human oversight, memory, ethics, uncertainty, and safe future intelligent systems.

Research use only: Please do not include patient information, customer private information, employer confidential data, internal screenshots, proprietary documents, passwords, private metrics, or anything that should not leave the company. Keep answers general and workflow-focused.

1. AI Trust and User Expectations

1. What makes you trust or distrust an AI system?

2. When should AI explain its reasoning?

3. What kinds of AI mistakes are unacceptable?

4. What should AI admit when it does not know?

5. What would make AI feel helpful without feeling controlling?

2. Human Oversight

6. What decisions should always require human approval?

7. When should AI stop and ask for help?

8. What should happen when AI confidence is low?

9. Who should review high-impact AI decisions?

10. How should approval history be recorded?

3. Memory and Personalization

11. What should an AI remember to be helpful?

12. What should an AI never remember without permission?

13. How should users correct wrong memories?

14. When should old memories be summarized or archived?

15. What would make shared company memory useful but safe?

4. Ethics and Morality AI

16. What ethical principles should guide AI decisions?

17. How should AI handle conflicting values?

18. When should AI refuse a request?

19. How should AI present tradeoffs and consequences?

20. What should humans decide instead of AI?

5. Explainability and Uncertainty

21. How should AI communicate uncertainty?

22. What confidence levels would be useful?

23. What should AI show when several options exist?

24. How much detail is too much detail?

25. What kind of explanation would help you make a decision?

6. Emotion and Communication

26. Should AI adapt its tone to human emotion?

27. What emotional signals should AI notice?

28. How should AI avoid pretending it has real feelings?

29. What tone makes AI feel supportive?

30. What tone makes AI feel fake or manipulative?

7. Failure and Improvement

31. How should AI learn from mistakes?

32. What failures should be escalated to humans?

33. What should be logged for future review?

34. How should AI prevent repeating the same mistake?

35. What would make a FutureAI system worthy of trust?
